**Imperial Immersion Suits (USCG Version)**

- Donovan offers a full service station. To pressure test and inspect suits. Suits must be in serviceable condition at all times. The pressure test can reveal leaks that can not be seen with the naked eye. A well maintained suit increases your chance of survival, lasts longer and saves you time and money. An experienced service technician can find seemingly minor defects that can cause major problems.
- The High Rider Ring. It is made of neoprene and attached by zippers making it easy for you to replace yourself. Most other suits have air bladders (high rider rings) that must be brought into a certified station to be replaced.
- Features:
  - One piece, sealed construction made of inherently buoyant 5mm neoprene.
  - Three fingered mitt to keep your fingers warmer.
  - Dual-zipper pull tabs.
  - Wide shoulders and legs for quick donning.
  - Snug-fitting face seal helps keep water out.
  - Back straps keep the ring in place.
  - Suits are true to size.
  - Equipped with whistle.
  - SOLAS-grade reflective tape provides extra visibility of wearer to rescue team.
  - Comes in sturdy storage bag with two handles.
